Response to Amendment

The following is in response to the amendment filed on September 20, 2006.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowed for providing at a mixing point of dilution water passed from a dilution water pipe and fresh stock passed from a fresh stock pipe at least one pipe portion having a wave-shaped cross-section perpendicular to the longitudinal axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed September 20, 2006 have been fully considered.

The objection to claim 5 and the rejection of claim 10 under 35 U.S.C. 112, second paragraph, both set forth previously, have been overcome by amendment.

The rejections under 35 U.S.C. 102(b) over FI 100168 and the rejection under 35 U.S.C. 103(a) over FI 100168 in view of Kaiser (US 3,812,007) set forth previously have been withdrawn in view of Applicant's arguments. It is recognized that the turbulence generating device in FI 100168 (Figures 8, 9) comprises ribs which extend longitudinally and radially from the end 17 of stock feed line 16 (analogous to claimed stock pipe 13) at the mixing point with dilution water line 13 (analogous to claimed line 11), which is different from providing a wave-shaped cross-section perpendicular to the longitudinal axis at the point of mixing.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
